

About Us

Mul Biotech Farms Pvt Ltd is an execution-driven agri-infrastructure company specializing in controlled environment agriculture (CEA) systems. We design, fabricate, and deploy scalable farming solutions across diverse geographies. With district-level government projects and active deployments, we deliver reliable, cost-efficient systems for commercial-scale agriculture.

Why Choose Us?

- 1 Complete farm systems delivered —from design to commissioning.
- 2 District-level and multi-location projects across real farming conditions.
- 3 Integrated solutions covering infrastructure, crops, and operations.
- 4 Cost-efficient, reliable, and ready for commercial use.

Services

Design and development of controlled and open-field farming models, including aquaponics, hydroponics, agroforestry, and multi-layer integrated farms.

End-to-end delivery covering planning, system design, site execution, installation, and commissioning of fully functional agricultural projects.

Implementation of carbon farming, water conservation, and sustainable land-use projects aligned with government programs and environmental goals.

Execution Across Diverse Conditions

- District-level and multi-location implementations
- Systems designed for varied climatic and operational environments
- Live demonstration units for validation and client onboarding

Execution & Experimentals

What We Offer?

- End-to-end development of multi-layer farming models including aquaponics, hydroponics, agroforestry, and integrated agriculture setups.
- Deployment of precision farming solutions with system design, monitoring frameworks, and on-ground execution support.
- Execution of carbon farming, water conservation, and environmental projects aligned with institutional and government initiatives.

Our Core offerings

- 1 Turnkey Mushroom Farming Systems
- 2 Integrated Farming Projects
- 3 Agroforestry & Plantation Systems
- 4 Aquaponics & Hydroponics Systems
- 5 High-Value Crop Infrastructure
- 6 Climate & Carbon Farming Projects
- 7 Bio-Inputs & Advanced Systems
- 8 Training & Capacity Building

Our Mission

- 1 **Build Scalable Farm Systems**
Deliver reliable and commercially viable agriculture solutions.
- 2 **Enable Technology-Driven Agriculture**
Integrate practical innovation to improve productivity and efficiency.
- 3 **Drive Sustainable Land Use**
Implement climate-resilient systems across carbon, water, and ecosystem projects.
